TUESDAY, - - DECEMBER 28, 1856. The Party for Liberty. The Black Republican party claim the merit of being the peculiar friends of freedom. Their clap-trap is made up of phrases indicating a seal for freedom. They mean, howaver, only the freedom of the negro, not of the white man. There is no question about the freedom of white men. When they speek of freedom, they mean negro freedom exclusively. All their soal is expended in shricking for the freedom of the negro; whether or if there was any insurance. it suits the white man or not. There is something in words, and the oatch-words invented and used delude thousands into the ranks of the shrickers, under the impression that liberty is in be the ebject for which the whole country is to be agituted; and, if need be, the union of these here this inscription: States is to be ascrifted to accomplish this end. White men are invited to convert, then, the whole polities of the country into a crusade to set the negro free. The negro has been a clave since the memory of man; and a slave in this country since its organization. It is cortally a question whether liberty is a blessing to the negro under the most favorable circumstances. His condition now is botter in a state of slavery in this country than it has ever been in any age or country The history of the race will point to his present

golden age of the uegro. Now we have a wild fanaticism, that, under condition of the black man, without looking at reasoning fanaticism, based on an ideal theory black man.

Let it be remembered that this whole Northern balcony, and said: movement is not for freedom in fact; but for the

The editor of the Journal is still very much opposed to introducing politics into the agricultural society, just as he is opposed to the egitation of the slavery question. All he is after is the election of Know-Nothing officers for the institution , and it is certainly very unreasonable to object. It is other people-Democrets-that are for introducing politics into this business;

We all understand exactly how it is. The peopia of this city have had a few years' experience on the subject. They know the party that have manis a party Mayor, and party Board of Counciland a party Polloo Court. They know who have made party trustees of public achools; who have nosed out and filled every little office in Louisicans should rule America, and other places too. Strange that a minority should presume to denounce this universal monopoly. The powers that be are to work for party-devote engine bouser, gue light, and coal to the great interest of party. It is certainly natural that having got all the offices but one, that should be filled by a Locofoco or Sag-Nicht. The editor and his party don't want to introduce politics into the aericultural society. They only want all the offices; that is all they want. They will be perfectly

matter. It is as well to make party agricultural societies as to make party schools ; indeed better. Having got the latter to perfection, it can't make and if they think they can profit by it, let them make the experiment, as we have no doubt but should be an office about here that a Know-Nothing doesn't fill. It mars the harmony of things in this vicinity. It is a meet unsightly exception a to universal rule.

Journal is very much opposed to introducing politics into the agricultural society; and, in order to prevent it, he is for giving the entire control of the concern to Know-Nothings.

Americans must rale America, and, consequent ly, the agricultural society. What they will have to rule after while is another question.

This city has been suffering for the want of cost, and the people must continue to pay a grievous tax for some time to come, perhaps; but will any effectual remedy be provided after the calamity is over. We must have a supply of soal from some source not depending for transportation upon the Ohio river. We have had sufficient experience to estisfy any reasonable people of the

folly of depending on that river. Nothing can be done in time for present emer gencies, but the future may be provided for. We do not suppose it will be attended to, however.

Let us have a full river, and pleuty of coal, and the pressure we have passed through will be forgetten. In the mean time we are assured that there is pleuty of coal within sixty miles of Louisville, and only fifteen miles from the Nashville railroad, that it is now believed will be construct.

Such was the great issue embodied in the language of the Kausas and Nebraska bill, and adopted in the Cincillary Patricon. Important as some knowledge of the weather is for the business and comfort of man, science itself has revealed nothing that will enable us to tell what a day may bring forth. From appearances, yesterday, we had reason to depresate the present, whatever the future may be. We have observed the present of the same respile who have seen up a credit for being stand such repeated sheels and constant agglestion? There is no hope of escape from this same respile who have seen up a credit for being some people who have got up a credl: for being weather-wise, but it is chiefly from their calling attention to their instances of success in predic tions, and keeping silent about their failures.

In the mean time can any one foretell what sort of weather is coming in the next two or three nonths? A wag says it will be wet or dry, cold r warm; and we believe he has hit it exactly.

Yesterday morning the dwelling-house of S. L. Nock, near Hobbs' depot, took fire and was entirely consumed. A good deal of the furniture was destroyed. The fire originated from a firewas destroyed. The fire originated from a fire-place in the second story, and had gotso far under leadway before it was discovered, about four unlied which luterrupt the free discussion of the place in the second story, and had got so far under o'clock, that no means could stop it. We find the following in a late number of the New York Herald:

The New York Hotel was filled at an early danger, and they are invited to the rescue. The least reflection should dissipate all the fog with which this subject is invested. The Cleveland Plaindealer announces the fact that christianity is about to be preached at Oberlin, Ohio. The anti-slavery bible, and the anti-slavery god have long held possession of that the Bouth, from a Senator from Georgia, that came proposition of last assetion to annul the Terribeathenish place; but an Episcopal church is better the conficted with the free expression of the repulse of Kennes or this intervention. of the North, that this hill was carried through rice have, at last, turned their attention to that God-forsaken place. What sort of winter are we going to have, this pistform, which is the only antegonist to the Demogratic doctrine, is to render agitation perpet-uel, not only in Congress but throughout the country. Day after day, and week after week, onsequeno except in the adoption of the princi-ples of the Kaussa and Nebraska bill, carried out n perfect good faith, in the spirit and language of the law, as designed by its framers. Is it not the duty, then, of every patriot, and especially of every member of the Democratic party, to yield to the incoming administration a cordial support in settling the only question which threatens the safe of the American Union?

To accomplish this great purpose it is necessary that all external violence and all interference of citizens of other States shall be removed from Kansas, and that the people who have settled or shall settle bong fide in that Territory shall be permitted to decide this question for themselves very question upon which the people of Kansas are called to decide, or which prevent, by test oaths or otherwise, the free exercise of the elec-tive franchise. And here, let me ask, what meantre was more just in all its provisions than the bill of the Senator from Georgia, passed by the Domo cratic Senate, and rejected by the Black Republi can House of Representatives? Let us now then make the issue so clear that it cannot be mista ken, and thus enable the administration to cettle this question upon these fair and just principles, this question upon the constitutional opporate sovbased upon the great destrine of popular sovcreignty and the constitutional equality of the
States, and we shall then indeed have achieved a
glorious viotory. We shall have succeeded, not
plorious viotory. We shall have succeeded, not
Tremont, the liberty pole of the late campaign
—the only "staffs" of political life left in our oponly in rescuing the country from the danger we have just essaped, but in a permanent settlement of this perilous question upon a basis which no foreign monarchs or domestic agitators can dis-free and unbiased suffrage, as seems most proba-ble, should decide that their local institutions shall be similar to those of New York or Pennsylvania, the Democracy of the South will cheer tully acquiesce in their decision.

And, fellow-citizens, is not this the only practi-

cable way lu which this agitation can be made to terminate, and the country he relieved from the perils by which we have been environed? Preceding administrations have seemed to settle the questions co. nected with slavery which threatened the peace of the country; but the settlement was based on temporary expedients and even upon undisguised violations of the constitution, and therefore could not be permanent. Should Mr. Buchanan succeed, as I believe he will, in effeeting a permanent settlement of this question upon the just and constitutional basis of the rescaling of the constitution. Having thus adjusted this question, we may turn our attention from the sable African to other questions of ad-American Democracy will carry him triumphant-ly through the conflict—a conflict, not of arms, for there is no such danger—but a conflict of opinions only.

Gentlemen, i son beside me a distinguished exile from Ireland, T. F. Moegher, who contributed so much to our shooess in the recent contest, and who perilled his life in the cause of his country's ican acli, here to devote his brave heart and bright

VIEST NIGHT OF THE KELLER THOUPS .- Notwithstanding the bitter weather last night Mosart Hall was crowded to repletences to witness the vivid portraitures of fancy and art. We are not in the babit of falling into ccetacies over the most beautiful bonquet tied up by the fluggers of fairy, but must confess there was a light fant stic tap at our heart as we witnessed the glowing pictures of the Trinmph of Galatea. the Battle of the Amazons, the Shower, and Bacchus and Ariadne. The other pictures were generally serions, or of a national character; and while thoy addressed themselves to the patriotic heart, and enlisted the eye of the connoissaur, they did not seem so full of poetry There can be no poetry without love. A play palls noon us without some seenes in which Cupic is the provailing god. Richelien, for instance, would be nothing withen: Jniio and De Manprat. But we've not time for prolixity. The tableaux were besutiful in the extreme, and, on reflection we are certain no' half enough has been said in their praise. Their artistic merit is unquestion The mind which contemplated the group ings, and arranges the tableaux, is that of a and ter. The pictures, conceived and illustrated by Mademe Keller, are among the very Lighes: monocements of agt. Genius seems to sl expressed, dividing the diadem with beauty or her brow. Suo is sustained by her sisters, who, with bereeff, comprise three graces, at whose matchices charms Pan migh vainly sigh forever als dirge through the reeds, for they seem of the immertal rtamp, for above entire.

He said he carried the ship blasm. for the sake of the pictures on them, and that he had found the diaft. It is inferred that als taste for the fine ares develops itself in s peculiar manner, and that he is decidedly fucky in the matter of finding things. In order to give him an opportunity to inform his friends of his emburrasements, his case was continued unti-Thursday next, and he, in the mean time, remanded to just.
